**'ORGANIC' HEDGE PROPOSAL**

The proposal is for a series of hedges to be planted in a way that will help to stop balls escaping the Green from the kickabout area but will also provide niches for sitting in and opportunities for play. Yew is proposed because it is evergreen, responds well to trimming and because it will link with the existing Yew topiary on the Green. The hedges are intended to take on an organic shape with varying width and height, rather than be trimmed to formal straight lines. The established hedge would have a minimum height of 900mm. The protection of a temporary fence would be required.
